

# ALTERNATIVE MACHINE TOOL

proudly presents our newest starting line up of machine tools

Fanuc's reputation has made them the world's leading manufacturer of numerical control machining equipment and factory automation.

- EDM
- Vertical Machining Centers

Yasda produces all of its key machining equipment components in-house, making their machines known worldwide for their accuracy and durability.

- 5-Axis
- Horizontal
- Vertical

OKK has been building high-quality manufacturing solutions for over 100 years, even producing its major machine components in-house for 100% quality control.

- 5-Axis
- Horizontal
- Vertical

Nakamura-Tome started with one turning center and drilling machine in 1949. Today, they are recognized worldwide as an industry-leader providing sophisticated machine tool equipment.

- Multitasking Machines
- Turning Centers

Kiwa's reputation for accuracy, speed, and reliability, combined with its expandable tool and pallet technology, has made them an industry-leading machine builder.

- 5-Axis
- Horizontal

With a history going back more than eighty years, WEILER has earned itself an excellent reputation in a wide range of industries and applications.

- Cycle-controlled precision lathes
- 4-way precision lathes

Methods Machine Tools designed and developed their VMC and 5-axis machining solutions in collaboration with Litz Hi-Tech, combining years of engineering and service experience with a commitment to quality and performance.

- 5-Axis
- Vertical
